

Corporate Social Responsibility

CSR is at the heart of our organization. Aqua Vision's core business is to offer products and solutions for the benefit of society, environment and our employees. Our main activities has been directly linked to water management, in projects on the development of estuaries and harbours, the protection against flood and the maintenance of eco-systems. Contributing to a sustainable future forms the core of our mission. We are proud of this and would like to promote the importance of our work in the coming years.

We strive to achieve a balance between the three Ps: People, Planet and Profit. It is a combination of striving to achieve good economic results with added value for society, the environment and our employees. By measuring our performance, we will be in a better position in the near future to monitor our progress more effectively and compare this progress with our objectives.

People

Our members of staff are our organization's success factor. Their knowledge and conduct are decisive for our operating results. Our social performance is concerned with our employees and our efforts to promote their safety and wellbeing. We strive for and invest in a diverse and highly qualified team.

Aqua Vision BV complies with applicable laws, regulations and international requirements as well as the United Nations Global Compact principles for human rights, labour rights, the environment and anti-corruption in line with our Aqua Vision BV's value of integrity. Moreover, we enter into dialogue with our stakeholders and communicate the choices that we make within our company. We emphasize that we want to do business with parties that can offer us high quality, sustainable products and services. We focus our efforts on customer care and regularly assess customer satisfaction.

Planet

Our environmental performance is concerned with limiting and preventing a negative impact on the environment, and involves us focusing on the further expansion of our environmental expertise and the ongoing investment in and use of environmentally friendly equipment. Moreover, Aqua Vision BV use targeted measures to reduce its own energy usage and to reduce the volume of waste that we ourselves produce.

Profit

We are working to maintain our leading position in our market. Long-term profitability is a prerequisite for achieving our business objectives. A sound financial basis enables us to meet our CSR and other corporate responsibilities. For more information in this context, we refer you to our annual figures.

Priorities set by Aqua Vision

Aqua Vision BV has performed priority settings within the three dimensions of People, Planet and Profit. For 2016, we have formulated objectives and action standards for these indicators. In the future, we would like to report this in more detail, including our progress.

Code of conduct

Aqua Vision BV wants to take responsibility for the impact of its business activities on people and the environment, whilst at the same time ensuring that the company's objectives can also be achieved in the longer term. The company has set a Code of Conduct that provides guidelines for ethical conduct to which the own organization, its suppliers and main third parties engaged by Aqua Vision must adhere.
